## Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 10-25, drawn to an integrated circuit classified in class 327, subclass 540.
- II. Claims, 1-9, 26-37, and 55-57 drawn to voltage reference generating circuit, classified in class 323, subclass 313
- III. Claims 38-39, drawn to a computer readable medium, classified in class 257, subclass 86
- IV. Claims 40-54, drawn to a method of manufacturing, classified in class 438, subclass 54.

The inventions are distinct, each from the other because of the following reasons:

Inventions III and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination requires the circuit to be computer readable medium encoding which is evidence that the particulars of the subcombination are not the sole reason for relying on patentability. The subcombination has separate utility such as use in a any circuit such as a flashlight circuit not requiring a computer readable medium.

Application/Control Number: 10/813,837

Art Unit: 2838

Inventions VI and III, II, I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process as claimed can be used to make other and materially different product such as either of the products I and III above.

Inventions III and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination requires a resistor coupled in a specific manner as claimed which is evidence that the particulars of the subcombination are not the sole reason for relying on patentability. The subcombination has separate utility such as a current amplifier.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination requires a resistor coupled in a specific manner as claimed which is evidence that the particulars

Application/Control Number: 10/813,837

Art Unit: 2838

of the subcombination are not the sole reason for relying on patentability. The subcombination has separate utility such as a current amplifier.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rajnikant B. Patel whose telephone number is 571-272-2082. The examiner can normally be reached on 6.30-5.00; m-f.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Karl EASTHOM can be reached on 571-272-1989. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
